Summary

Junior Full-Stack Developer experienced in building scalable web applications with React, Next.js, and Node.js. Developed 3+ projects featuring secure authentication, role-based access control, and RESTful API integrations. Skilled in PostgreSQL and MongoDB databases with proven deployment experience on modern cloud platforms.

Skills

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Tailwind CSS, Redux, Zustand, ShadCN UI

Backend: Node.js, Express.js, Nest.js, Better Auth, Mongoose, Drizzle ORM

Databases: MongoDB, PostgreSQL

AI Frameworks: LangChain, LangGraph

Tools & Version Control: Git, GitHub, VS Code, Postman

Work Experience

Code Expert | Junior Full Stack Developer

Jul-2025 – Dec-2025

- Developed production-level multi-vendor e-commerce platform serving food, gift modules with role-based access control
 - Built and maintained two distinct dashboards (User, Vendor) with dynamic UI rendering and conditional logic
 - Implemented secure authentication and authorization using NextAuth with protected routes and session management
 - Designed and integrated RESTful APIs handling orders across multiple modules with shared schemas and optimized data flow
 - Translated Figma designs into responsive, pixel-perfect UI components using Tailwind CSS and ShadCN UI
 - Integrated Resend for transactional email notifications
 - Optimized MongoDB queries using Mongoose lean queries and schema design patterns for improved performance
- Next.js | Node.js | Express.js | MongoDB | NextAuth | Resend

Projects

Movie Information App

Next.js | TMDB API | NextAuth.js | ShadCN UI | MongoDB

- Built a movie discovery platform integrating TMDB API for real-time movie data and recommendations
- Implemented secure user authentication and session management using NextAuth.js
- Developed custom API routes for data abstraction and optimized backend performance
- Designed responsive UI with ShadCN components ensuring accessibility standards

Vidly - YouTube Comment Sentiment Analysis Platform

Node.js | Express.js | LangChain | LangGraph | BullMQ | Redis | Socket.io

- Co-developed AI sentiment analysis tool processing YouTube comments with 80% backend contribution
- Architected asynchronous queue system with BullMQ/Redis where jobs are processed by workers on-demand
- Built LangGraph workflow with parallel processing pipelines for sentiment classification and insights generation
- Implemented API key rotation across 8 Gemini keys, real-time WebSocket progress tracking, and Redis rate limiting
- Deployed backend on Render, Resend email integration, and SEO optimization
