Summary

Full stack developer experienced in building full-stack web applications and AI-driven systems. Skilled in React, Next.js, Node.js, and Python, with focused expertise in LangChain, LangGraph, n8n, and RAG-based automation.

Skills

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, Tailwind CSS, ShadCN UI, Redux, Zustand

Backend: Node.js, Express.js, NestJS, Fast API, NextAuth, Better Auth, JWT

Databases & ORMs: MongoDB, Mongoose, PostgreSQL, Drizzle ORM, Redis, Qdrant

AI & Automation: LangChain, LangGraph, n8n, AI Chatbots, AI Workflows, RAG

Development Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render

Work Experience

Mozzine Technologies | Frontend Developer (on-site)

Nov-2025 – Apr-2026

- Developed and delivered responsive, visually polished web interfaces for multiple projects, focusing on clean UI, smooth interactions, and cross-browser compatibility.
- Built reusable component libraries and interactive UI elements using modern frontend technologies, consistently translating design mockups into pixel-perfect, production-ready code.
- Collaborated closely with design and backend teams to integrate APIs and ensure seamless user experiences across desktop and mobile devices.

Code Expert | Junior Full Stack Developer (on-site)

Jul-2025 – Oct-2025

- Developed multi-vendor e-commerce platform with 2 role-based dashboards handling food and gift product modules
- Built 15+ RESTful API endpoints with unified MongoDB schemas and validation middleware for orders, products, and vendor operations
- Optimized database queries achieving 40% faster response times using Mongoose lean projections and compound indexes
- Implemented NextAuth.js authentication with JWT sessions, protected routes, and role-based access middleware
- Translated 20+ Figma screens into responsive components using Tailwind CSS and ShadCN UI
- Integrated Resend API for transactional emails (order confirmations, vendor notifications, password resets)

Projects

Vidly - YouTube Comment Sentiment Analysis Platform

Node.js | Express.js | LangChain | LangGraph | BullMQ | Redis | Socket.io

- Co-developed AI sentiment analysis platform processing 1,000 YouTube comments in 90 seconds with 80% backend ownership
- Architected BullMQ/Redis job queue system supporting 3 concurrent analyses with on-demand worker processing
- Built LangGraph workflow with parallel pipelines for sentiment classification and insight generation using Gemini API
- Implemented multiple keys Gemini API rotation with Redis rate limiting and WebSocket progress tracking
- Deployed backend on Render, Resend email integration, and SEO optimization
